AWARD-WINNING CATOR PARK

Photography of Kidbrooke Village.

A generous sense of space is a defining feature of Kidbrooke Village. Set amongst 86 acres of parkland and open space, equivalent to over 45 football pitches, bubbling waterways and trails meander enticingly through the green open spaces.

Cator Park is particularly alluring; a vibrant river of colour, meadow flowers and wild landscaping winding through the village. Here, Berkeley works in partnership with London Wildlife Trust and HTA Design, rewilding the park to increase the diversity of birds, mammals and insects living in this wonderful natural space. It's a long-term project, with planting increasing year-on-year. To date, more than 750 mature trees have been added, making a significant impact on local air quality.

The impact of all this work was recently recognised at the 2020 Landscape Institute Awards. Cator Park won the Sir David Attenborough Award for Enhancing Biodiversity, as well as the Overall President's Award for the best landscape scheme.

“Everything that’s happening at Kidbrooke Village is helping to make it a more wildlife-rich environment that future generations can enjoy.”

PARK LIFE

Cator Park's stunning landscaping makes it a place where you will regularly want to spend time, and it is particularly inviting for families.

Within it is a magnificent new play park, which will keep the children amused for hours. The unique adventure playground, loved by parents and children alike, offers the community a safe place to come together, meet and play.

The multi-use games area is another excellent facility, where families and friends can stay active and enjoy time outdoors. Residents can keep fit on the tennis courts, get a group together for five-a-side football, or simply jog, walk or ride along the many parkside pleasant pathways.

Sutcliffe Park is also part of Kidbrooke Village. It has prestigious Green Flag status, and its many attractions include a popular sports centre with an athletics track, a climbing wall and skate park. The Quaggy River runs through the park, creating its own wetland area and nature reserve.

Kidbrooke Village is a place where people aspire to live, work and play.

That means not only are they comfortable in both winter and summer but also remarkably economical to run.

How many houses have a roof that's worth talking about? The roof terrace on your Urban House is a hidden gem, a private place to relax and take in the 360 degree views.

The roof terrace is unique in letting residents enjoy the light all day long, unlike traditional front or rear gardens, creating the perfect place to entertain, as well as for kids to safely play. DESIGNED FOR LIFE

Designed for life

At Berkeley, we are committed to creating great places where people love to live, work and relax. Where the homes are light-filled, adaptable and finished to very high standards. Where carefully planned public areas enhance wellbeing and quality of life for residents and visitors. Where people feel a sense of community.

Customers drive all our decisions

We achieve that by putting our customers at the heart of everything we do. First, we strive to understand what our customers want and need – well-built homes, in a pleasant and safe neighbourhood, with plenty of amenities and good transport connections. Then we apply that understanding to all our planning and design decisions.

And for every new development, we challenge ourselves to go further, to improve and innovate, ensuring we satisfy the real needs of our customers in inspiring and sustainable ways.

Choice and diversity

No two Berkeley customers are the same, so we aim to offer a wide choice of property location, size and type. From central London to major towns and cities; from market towns to rural villages, countryside to the coast – we build in locations our customers love. And whatever home you are looking for, whether that's a city penthouse, a modern studio apartment or traditional family home, you will find the perfect fit for your lifestyle.

Quality first to last

Quality is the defining characteristic of Berkeley developments, right down to the very last detail. We choose our locations, style of homes, construction practices, materials and specifications with great care. When you buy a new home from Berkeley you can be safe in the knowledge that it is built to high standards of design and quality, has low environmental impact and that you will receive a professional, efficient and helpful service from us. For extra peace of mind, all new properties come with a 10-year build warranty.

Green living

For Berkeley, sustainability isn't simply the latest buzzword. We are committed to creating a better environment within our developments and in the areas that surround them. That's why we build on brownfield sites whenever we can, bringing new life to disused and unloved spaces. We take care to protect the natural environment and enhance biodiversity. All our homes are designed to reduce water and energy consumption, and to enable residents to recycle waste.

Commitment to the future

When we plan a development, we take a long-term view of how the community we create can thrive in years to come. Our aim is to permanently enhance the neighbourhoods in which they are located, through intelligent design, quality landscaping, sympathetic architecture or restoration, and high standards of sustainability. We don't just build for today; we build for the future too.

THE BERKELEY FOUNDATION

We are committed to making a real and lasting difference to the communities we serve.

The Berkeley Foundation supports voluntary organisations in tackling long-term social issues in their local community. Working together, we help people choose a different life path, develop confidence and skills, and find hope for the future.

Since we established the Berkeley Foundation in 2011, we have committed many millions of pounds to hundreds of charities and organisations. A significant proportion of our donations are raised through the tireless efforts of our own staff.

THIS IS HOW WE ARE ENSURING SUSTAINABILITY AT KIDBROOKE VILLAGE

People, planet, prosperity

Sustainability is fundamental to Berkeley's ethos. In simple terms, we want to ensure the long-term health, wellbeing and prosperity of people and the planet. There are a range of ways we are managing and minimising the environmental impact of our operations and delivery of homes and communities. These are the initiatives we have implemented at Kidbrooke Village.

Nature and biodiversity

Parkland, trees, flowers, green roofs, ponds, hedges, gardens – these are the fundamentals of a thriving natural environment that can be enjoyed by everyone. They are all part of our commitment to creating a net biodiversity gain on our developments. Within and around Kidbrooke Village, we have created natural habitats that encourage wildlife to flourish. We are working with London Wildlife Trust and HTA Design Ltd to engage residents in the natural landscapes that we have created.

Waste and recycling

We actively encourage all residents to reduce their waste wherever possible. In addition to external recycling bins, we provide integrated recycling bins in kitchens to make it easier to separate and recycle waste.

Water efficiency

Our homes are designed to high water efficiency standards and are fitted with dual flush WCs, low-flow taps and showerheads which use less water without compromising convenience and comfort. We also suggest simple steps to reduce water consumption, such as not leaving taps running unnecessarily.

Energy efficiency

Efficient use of electricity and gas helps lower fuel bills and reduces carbon emissions. Our homes have been designed to use less energy than a standard home. They have enhanced levels of thermal insulation and air-tightness, and have been fitted with mechanical ventilation units with heat recovery (MVHR). All lighting is low energy and kitchen appliances are A++/A+/A rated.

Noise reduction

We can't eliminate noise, but we consider the impact of noise in the design of our homes. We consider external noise, such as from nearby roads, and internal noise including the transfer between rooms and floors. We incorporate measures to reduce the different types of noise wherever possible to create a quieter environment.

Clean air

It is hard to avoid polluted air, particularly in our cities. Throughout Kidbrooke Village we have planted trees, shrubs and flower beds to help create a cleaner air environment. Within our homes we provide mechanical ventilation to filter the internal air.

Sustainable transport

We provide cycle paths, secure cycle parks and car charging points to encourage the use of sustainable methods of transport, to help reduce air pollution around the development and the wider area. These active methods of transport also help encourage healthier lifestyles.

Stewardship

Maintaining our communal open spaces and facilities in perpetuity is an important benefit to the whole community. We work with Rendall & Rittner and residents to ensure the development remains in pristine condition.

Future-proof design

From the early stages of design, we assess how our homes will stand up to the future effects of climate change, such as how they will be affected by higher summer temperatures, periods of drought, or more extreme rainfall. We are constantly researching how we can ensure our homes and developments are more resilient to these extremes to understand what new innovative technologies we should use in our future designs.
